Rural Citizens Access to Telehealth
RCAT

The **Rural Citizens Access to Telehealth (RCAT)** project is a partnership between the Missouri Telehealth Network and the Department of Social Services, MO HealthNet Division. Together, we will provide funding, education, and training opportunities to introduce or enhance existing telehealth services for rural providers accepting Medicaid patients.

Explore Telehealth for your Organization

From March 2020-February 2021, 32.5 million services were delivered via telehealth compared to only 2.1 million services the previous year. - GAO Report

Telemedicine services provide an opportunity for citizens living in rural areas with unique rural healthcare challenges to access services in the comfort of their home and/or community.

✓ **Increase Access**
Reduce barriers to care such as time and distance

✓ **Better Outcomes**
Patients receive consistent, timely, appropriate care

✓ **Patient Recruitment and Retention**
Increase patient volume while maintaining existing patients
