

Issue Brief

FEDERAL ISSUE BRIEF • August 1, 2017

KEY POINTS

- CMS is projecting that IRF PPS payments will increase 0.9 percent or \$75 million in 2018
- Finalizing their proposal to remove the 25 percent payment penalty for IRF-PAI late transmissions
- Refine the ICD-10-CM lists used to determine presumptive compliance and count toward the “60 percent rule”
- Revisions to the IRF quality reporting program

CMS Finalizes Inpatient Rehabilitation Facility FY 2018 PPS Update

The Centers for Medicare & Medicaid Services has published a final rule to update the payment rates for inpatient rehabilitation facilities for federal fiscal year 2018.

The rule also (1) revises the International Classification of Diseases, 10th Revision, Clinical Modification (ICD-10-CM) diagnosis codes that are used to determine presumptive compliance under the “60 percent rule,” (2) removes the 25 percent payment penalty for inpatient rehabilitation facility patient assessment instrument (IRF-PAI) late transmissions, (3) removes the voluntary swallowing status item (Item 27) from the IRF-PAI, (4) summarizes comments regarding the criteria used to classify facilities for payment under the IRF PPS, (5) provides for a sub-regulatory process for certain annual updates to the presumptive methodology diagnosis code lists, (6) adopts the use of height/weight items on the IRF-PAI to determine patient body mass index greater than 50 for cases of single-joint replacement under the presumptive methodology, and (7) revises and updates measures and reporting requirements under the IRF quality reporting program (QRP).

The 241-page document is scheduled for publication in the *Federal Register* Aug. 3. A copy is currently available at <https://s3.amazonaws.com/public-inspection.federalregister.gov/2017-16291.pdf>.

This link will change upon publication. The Aug. 3 *Federal Register* site will be <https://www.federalregister.gov/documents/2017/08/03/2017-16291/medicare-program-inpatient-rehabilitation-facility-prospective-payment-system-for-federal-fiscal>.

COMMENT

CMS states that “the overall economic impact of this final rule is an estimated \$75 million in increased payments from the federal government to IRFs during FY 2018.” CMS also states that “the total reduction in costs in FY 2018 for IRFs for the new quality reporting requirements is estimated to be \$2.6 million.”

CMS notes that it received 76 timely responses from the public.

CHANGES TO IRF PAYMENT POLICIES AND RATES:

Update to the payment rates under the IRF PPS

For FY 2018, CMS is finalizing an update to the IRF PPS payments to reflect a 1 percent increase factor, mandated by the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA). An additional approximate 0.1 percent decrease to aggregate payments due to updating the outlier threshold results in an overall estimated update for FY 2018 of approximately 0.9 percent (or \$75 million), relative to payments in FY 2017.

No changes to the facility-level adjustments

For FY 2018, CMS will continue to maintain the facility-level adjustment factors at current levels.

Rural Adjustment Transition

FY 2018 is the third and final year of the phase-out of the 14.9 percent rural adjustment for the 20 IRF providers that were designated as rural in FY 2015 and changed to urban under revised Office of Management and Budget delineations in FY 2016. Thus, CMS will no longer apply a rural adjustment for these IRFs.

FY 2018 UPDATE TO THE CASE-MIX GROUP RELATIVE WEIGHTS AND AVERAGE LENGTH OF STAY VALUES

The table below includes the CMGs, the comorbidity tiers, the corresponding relative weights, and the average length of stay values for each CMG and tier for FY 2018. The average length of stay for each CMG is used to determine when an IRF discharge meets the definition of a short-stay transfer, which results in a per diem case level adjustment.

Relative Weights and Average Length of Stay Values for Case-Mix Groups

CMG	CMG Description (M=motor, C=cognitive, A=age)	Relative Weight				Average Length of Stay			
		Tier 1	Tier 2	Tier 3	No Comorbidities Tier	Tier 1	Tier 2	Tier 3	No Comorbidities Tier

5104	Expired, not orthopedic, length of stay is 16 days or more				2.0334				21

CMS states the largest decrease in a CMG relative weight value affecting the largest number of IRF cases would be a 3.6 percent decrease in the CMG relative weight for CMG 0506 — Nontraumatic spinal cord injury, with a motor score less than 23.75-- in tier 3.

FY 2018 IRF PPS PAYMENT UPDATE

As noted above, CMS is applying an increase factor of 1 percent to update the IRF prospective payment rates for FY 2018. Further, IRFs that fail to provide quality measures will receive a 2.0 reduction.

Absent the MACRA mandate, the FY 2018 payment increase factor would have been 1.25 percent, reflecting a FY 2018 estimated marketbasket update of 2.6 percent with an estimated productivity adjustment of 0.6 percentage point, and a 0.75 percentage point reduction as required by the Affordable Care Act.

LABOR-RELATED SHARE FOR FY 2018

CMS will set the total labor-related share for FY 2018 at 70.7 percent – as proposed.

AREA WAGE ADJUSTMENT

The wage index applicable to FY 2018 is available on the CMS website at <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/InpatientRehabFacPPS/Data-Files.html>. Table A is for urban areas, and Table B is for rural areas.

CALCULATIONS TO DETERMINE THE FY 2018 STANDARD PAYMENT CONVERSION FACTOR

CMS has calculated the FY 2018 standard conversion factor as shown in the table below:

Explanation for Adjustment	Calculations
Standard Payment Conversion Factor for FY 2017	\$15,708
Market Basket Increase Factor for FY 2018 (1.0 percent), as required by MACRA	x 1.0100
Budget Neutrality Factor for the Wage Index and Labor-Related Share	x 1.0007
Budget Neutrality Factor for the Revisions to the CMG Relative Weights	x 0.9976
FY 2018 Standard Payment Conversion Factor	= \$15,838

The CMG relative weights (shown above) are multiplied the FY 2018 standard payment conversion factor (\$15,838), resulting in unadjusted IRF prospective payment rates for FY 2018 as shown below.

FY 2018 Payment Rates				
CMG	Payment Rate Tier 1	Payment Rate Tier 2	Payment Rate Tier 3	Payment Rate No Comorbidity
0101	\$ 13,470.22	\$ 11,544.32	\$ 10,665.31	\$ 10,191.75
0102	\$ 16,914.98	\$ 14,494.94	\$ 13,391.03	\$ 12,797.10

UPDATE TO PAYMENTS FOR HIGH-COST OUTLIERS UNDER THE IRF PPS

CMS will update the outlier threshold amount from \$7,984 for FY 2017 to \$8,679 for FY 2018 to account for the increases in IRF PPS payments and estimated costs and to maintain estimated outlier payments at approximately 3 percent of total estimated aggregate IRF payments for FY 2018.

CMS notes it received only four public comments on this item.

REMOVAL OF 25 PERCENT PAYMENT PENALTY FOR LATE TRANSMISSIONS OF THE IRF-PAI

Under the IRF PPS, CMS currently applies a 25 percent payment penalty to IRF patient assessment instrument (IRF-PAI) submissions that are not timely transmitted to the data repository. CMS is eliminating this 25 percent payment penalty.

REVISION TO THE IRF-PAI TO REMOVE THE VOLUNTARY ITEM 27 (SWALLOWING STATUS)

CMS says it no longer believes that voluntary item 27 is necessary, and in the interest of reducing burden on providers, the agency is removing this item from the IRF-PAI for all IRF discharges beginning on or after Oct. 1, 2017.

REFINEMENTS TO THE 60 PERCENT RULE PRESUMPTIVE METHODOLOGY

CMS is finalizing its proposed revisions involving Traumatic Brain Injury and Hip Fracture Codes codes for Impairment Group Codes (IGCs) 0002.21, 0002.22, 0008.11, and 0008.12, with the additional removal of the following ICD-10-CM codes from the list of IGCs that meet presumptive compliance criteria (allowing these codes to count toward the presumptive methodology):

- S02.101B—Fracture of base of skull, right side, initial encounter for open fracture;
- S02.102B—Fracture of base of skull, left side, initial encounter for open fracture;
- S02.101A—Fracture of base of skull, right side, initial encounter for closed fracture; and
- S02.102A—Fracture of base of skull, left side, initial encounter for closed fracture.

In addition, CMS is finalizing its proposals to retain S06.9X9A—Unspecified intracranial injury with loss of consciousness of unspecified duration, initial encounter as an excluded code under IGC 0002.22—Brain Dysfunction, Traumatic, Closed Injury. CMS is also finalizing its proposal to retain the diagnosis code exclusions with the code label, “fracture of unspecified part of neck of unspecified femur”, specifically the 3 code exclusions for S72.009-, Fracture of unspecified part of neck of unspecified femur.

These changes are effective for IRF discharges occurring on and after Oct. 1, 2017. The revised IGC list is available for download from the CMS website at <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/InpatientRehabFacPPS/Downloads/ICD-10-CM-DataFiles.zip>

COMMENT

There is much detail about codes in the final rule. The material is well written, but it is lengthy.

USE OF IRF-PAI DATA TO DETERMINE PATIENT BMI GREATER THAN 50 FOR CASES OF LOWER EXTREMITY SINGLE JOINT REPLACEMENT

CMS is finalizing its proposal to use the information recorded for Item 25A-Height and Item 26A-Weight on the IRF-PAI to calculate BMI greater than 50 for cases of lower extremity single joint replacement and to use that data to determine and presumptively count lower extremity single joint replacement cases toward an IRF's presumptive compliance percentage, effective for all IRF discharges occurring on and after Oct. 1, 2017.

CHANGES TO THE IRF QRP

The IRF QRP currently has 18 currently adopted measures, as outlined in the table below.

Quality Measures Currently Adopted for the IRF QRP	
Short Name	Measure Name & Data Source
IRF-PAI	
Pressure Ulcers	Percent of Residents or Patients with Pressure Ulcers That Are New or Worsened (Short Stay) (NQF #0678)
Patient Influenza Vaccine	Percent of Residents or Patients Who Were Assessed and Appropriately Given the Seasonal Influenza Vaccine (Short Stay) (NQF #0680)
Application of Falls	Application of Percent of Residents Experiencing One or More Falls with Major Injury (Long Stay) (NQF #0674)*
Application of Functional Assessment	Application of Percent of LTCH Patients with an Admission and Discharge Functional Assessment and a Care Plan That Addresses Function (NQF #2631)*
Change in Self-Care	IRF Functional Outcome Measure: Change in Self-Care Score for Medical Rehabilitation Patients (NQF #2633)**
Change in Mobility	IRF Functional Outcome Measure: Change in Mobility Score for Medical Rehabilitation Patients (NQF #2634)**
Discharge Self-Care Score	IRF Functional Outcome Measure: Discharge Self-Care Score for Medical Rehabilitation Patients (NQF #2635)**
Discharge Mobility Score	IRF Functional Outcome Measure: Discharge Mobility Score for Medical Rehabilitation Patients (NQF #2636)**
DRR	Drug Regimen Review Conducted with Follow-Up for Identified Issues—PAC IRF QRP*
NHSN	
CAUTI	National Healthcare Safety Network (NHSN) Catheter-Associated Urinary Tract Infection (CAUTI) Outcome Measure (NQF #0138)
MRSA	NHSN Facility-Wide Inpatient Hospital-Onset Methicillin-Resistant Staphylococcus aureus (MRSA) Bacteremia Outcome Measure (NQF #1716)
CDI	NHSN Facility-wide Inpatient Hospital-Onset Clostridium difficile Infection (CDI) Outcome Measure (NQF #1717)
HCP Influenza Vaccine	Influenza Vaccination Coverage among Healthcare Personnel (NQF #0431)

Quality Measures Currently Adopted for the IRF QRP

Short Name	Measure Name & Data Source
Claims-based	
All-Cause Readmissions	All-Cause Unplanned Readmission Measure for 30 Days Post Discharge from IRFs (NQF #2502)
MSPB	Medicare Spending per Beneficiary (MSPB)–PAC IRF QRP*
DTC	Discharge to Community–PAC IRF QRP*
Potentially Preventable Readmissions (PPR) 30 day	Potentially Preventable 30-Day Post-Discharge Readmission Measure for IRF QRP*
PPR Within Stay	Potentially Preventable Within Stay Readmission Measure for IRFs*

Analysis provided for MHA
by Larry Goldberg,
Goldberg Consulting

*Not currently NQF-endorsed for the IRF setting

**In satisfaction of section 1899B(c)(1) of the Act quality measure domain: functional status, cognitive function, and changes in function and cognitive function domain.

Effective Oct. 1, 2018 (FY 2019), CMS is finalizing the replacement of the current pressure ulcer measure with an updated version of that measure.

CMS is removing the All-Cause Unplanned Readmission Measure for 30 Days Post-Discharge from IRFs (NQF #2502) beginning with the FY 2019 IRF QRP.

CMS also is finalizing the public display of six additional quality measures on the IRF Compare website in calendar year 2018.

For the FY 2020 IRF QRP, CMS is finalizing that the data IRFs submit on the measures Application of Percent of Long-Term Care Hospital Patients with an Admission and Discharge Functional Assessment and a Care Plan That Addresses Function (NQF #2631) and Changes in Skin Integrity Post-Acute Care: Pressure Ulcer/Injury meet the definition of standardized patient assessment data. However, in response to the comments received for the FY 2020 program year, CMS is not finalizing its proposed additional standardized data elements.

Lastly, CMS is finalizing its proposals with respect to the applicability of current procedural requirements, such as the mechanism for reporting and reporting schedules, to the standardized patient assessment data.

COMMENT

This rule is well written and easy to follow.

CMS devotes some 100 pages to the quality items representing a half of the entire rule. As said in previous analyses of payment issues, the subject of quality is becoming extremely paramount and requires both careful and thoughtful attention.
