10 – 11 a.m.

HIDI Advantage Optics Dashboards and Reporting

HIDI will discuss the recent transition to HIDI Advantage Optics as its flagship business intelligence system. The Optics platform provides HIDI-participating hospitals an immersive experience when interacting with data to create presentation-ready visuals and graphics. Additionally, the system can produce table-based reports available for export. The Optics platform currently is deployed to Missouri hospitals and several HIDI state partners with more than 2,000 users. HIDI Advantage Optics hosts dashboards pertaining to hospital market share, physician loyalty, hospital readmissions and mortality, and hospital-acquired conditions.

Thursday, November 3

10 – 11 a.m.

HIDI ADT Solutions and Hospital Alerting

HIDI, joined by partner Collective Medical, will provide an overview, use cases and examples for its Admission Discharge Transfer solutions platform. During the presentation, HIDI and Collective Medical team members will discuss the benefits of using HIDI's smart and predictive alerts to aid clinicians in organizing patient care. The alerts are provided to hospital team members via a portal or EHR interface. The service is available to all HIDI-participating hospitals at no cost. HIDI welcomes all senior leaders, care managers and quality team members to participate.
