

Care Compare and Provider Data Catalog July 2023 Data Refresh for Hospitals

The Centers for Medicare & Medicaid Services (CMS) [Care Compare](#) website provides consumers with information on over 100 quality measures for over 4,000 hospitals nationwide, including Veterans Administration (VA) medical centers and Department of Defense (DoD) military hospitals.

The Overall Hospital Quality Star Rating summarizes data from existing measures on Care Compare for each hospital to allow users to easily compare hospitals. Patients and caregivers can also compare hospitals' performance for many common conditions.

As finalized in the Calendar Year 2021 Outpatient Prospective Payment System (OPPS) and Ambulatory Surgical Center (ASC) Payment System Final Rule (CMS 1736-P), Veterans Health Administration (VHA) hospitals reporting data for measures included in Overall Star Ratings are included in the calculations alongside non-VHA hospitals and are eligible to receive their own Star Ratings in July 2023. Previously, while VHA data was included with all other hospitals at the measure level, they were not eligible to receive Star Ratings and were excluded from all Star Rating calculations.

With the [Provider Data Catalog](#), users can explore and download hospital data, as well as data on ambulatory surgical centers, inpatient psychiatric facilities, and some cancer hospitals. Publicly displaying quality information encourages hospitals and other health care facilities to make continued improvements in care.

CMS updates the data on Care Compare and the Provider Data Catalog websites quarterly, though not all data are updated each quarter.
